DDS&T  
Room 6E45 - Headquarters

Our continuing coordination  
with OC on Modernization. We  
expect OIT to also be playing a  
role in support of FBIS.

MEMORANDUM FOR: Director of Communications

FROM:

  
Director, Foreign Broadcast Information Service

25X1

SUBJECT: FBIS Communications Support 

25X1

REFERENCE: OC-1109-84, dtd 19 Dec 84 

25X1

Dan:

1. The FBIS Modernization activities continue on schedule with most elements expected to be under contract by early this summer. The purpose of this memorandum is to thank you for the support provided by OC personnel in recent months, document our current requirements, and solicit your guidance on how the new OIT organization affects the inter-office relationships.

25X1

2. The elements of Modernization involving significant Washington area communications are FBIS Headquarters Automation and INTERNET (satellite communications from FBIS overseas bureaus). Attached is a summary of our communications requirements resulting from these two initiatives. A separate development is the installation of a 10-meter antenna system at Headquarters. This system, intended to monitor satellite television, will be operational by September of this year. The need date for Key/Headquarters video transmission capability in September 1985 is determined by this Headquarters TV monitoring system. These same links will serve INTERNET when it is activated in January 1987.

25X1

3. Your designated focal point officer, , and other OC personnel have been very helpful during recent months. It is becoming obvious that most of our requirements can be satisfied by commercial lease with negligible engineering development. This observation raises the question of our relationship with OIT. While you may want to maintain some purview of the worldwide INTERNET initiative, are local
